

## Schematic Geological Cross-Section

Not to scale

National grid references for site	
North 46200, 33190	South 46240, 33155

This sketch represents an interpretation of the geometrical relationships of the main rock units described in the text. It is not to scale.

The blue line indicates 'rockhead'; that is the base of superficial deposits. This is the 'geological rockhead', as distinct from the 'engineering rockhead', which is the base of 'engineering soil' (in the sense of BS5930:1999).
